

THE
Rocky Mountain Hardware
COLLECTION

Creating architectural hardware for discerning clients since 1994, Rocky Mountain Hardware continues to offer the finest quality in the industry. Each piece is handcrafted and cast with the beauty of solid, art-grade bronze. Accenting its strength and integrity is your choice of patina, which enhances the individual nature of the hardware; no two pieces look alike. Yet, it is the sophisticated texture inherent in our hardware that makes our product stand out from the rest.

Rocky Mountain Hardware's simple, clean lines are designed to complement a broad range of architectural styles, from classic to contemporary. The textural nuance of the cast bronze mellows naturally into a deep, glowing patina giving a timeless spirit to each of our coordinating elements.

With this partnership, Rocky Mountain is creating fine bronze hardware to specifically interact with the Trilennium™ mechanism—thus making a top of the line multi-point system which meets or exceeds strict hurricane and security codes.

Patina Options

SILICON BRONZE LIGHT (BL)

SILICON BRONZE MEDIUM (BM)

SILICON BRONZE DARK (BD)

SILICON BRONZE RUST (BR)

SILICON BRONZE BRUSHED (BBB)

WHITE BRONZE LIGHT (WL)

WHITE BRONZE MEDIUM (WM)

WHITE BRONZE DARK (WD)

WHITE BRONZE BRUSHED (WBB)

Rocky Mountain Hardware uses only the highest quality bronze to achieve our unique designs. Silicon and white bronze are both alloys. Silicon bronze contains copper, silicon, and zinc creating a coppery-gold color. White Bronze is composed of copper, manganese, nickel, and zinc producing a silvery color. The photos shown in this brochure give a close representation of the true appearance of these patinas; however, the various elements of time, touch, and climate work together with the bronze and patina to create a unique hue. Each piece, then, distinctly reflects its surrounding.

Escutcheon Options

E555/E554 CURVED ENTRY SET
2 1/2" x 13"
Shown with the L224 Ridge lever in silicon bronze,
medium patina

Shown in white bronze, light patina

L314 UJ LEVER

Shown in silicon bronze, dark patina

The Trilennium™ Multi-Point hardware system from W&F provides more than just security, it offers homeowners better door closure and sealing than a single point lock. This locking mechanism features a durable and ergonomic design, allowing for easy door operation.

Security and functionality are paramount when choosing door hardware, and you'll find both in Trilennium™, a truly innovative multi-point hardware solution from W&F Manufacturing.

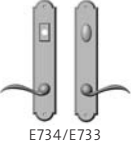

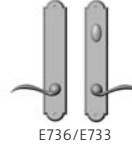

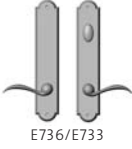

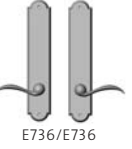

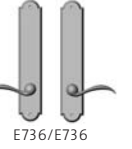

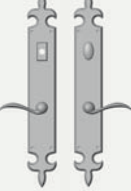

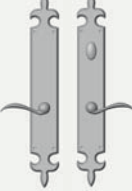

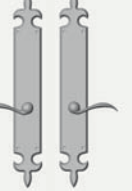

Features of the Trilennium™ Multi-Point System:

- Meets or exceeds the most stringent hurricane codes. (Exceeds ASTM Grade 40 & DP95)
- Added security—All 3 points latch and all 3 points deadbolt. (1" throw)
- Easy release of the latch and deadbolt in a single downward movement of the lever. (Intuitive North American function)
- Each deadbolt includes an anti-saw hardened steel pin.
- Roller construction for easy, low force operation.
- Top and bottom latch design allows for door misalignment and 3/16" pull-in when deadbolted.
- Visual locked/unlocked indication. (90° thumb-turn rotation)
- Proven design and reliability with over 10 years of field operation.
- Designed and manufactured in the USA.
- 10 year limited warranty on materials and workmanship.
- Schlage "C" cylinders come standard with Rocky Mountain Hardware trim.
- Standard heights for 6'8", 8'0", 9'0", and 10'0" doors, with custom heights available.
