

THE *Entrance Grip Handle Set*

The Rocky Mountain Hardware/W&F Entrance Grip Handle Set is specifically designed to drive the W&F Mfg. Trilennium™ multi-point swing door lock systems. This is the only entrance grip handle system for multi-point locks in the world.

The Trilennium™ lock functions intuitively the same way as the majority of locks used in North-America. A lever is not required for locking, allowing the development of these new exterior Entrance Grip Handle Sets.

With this partnership, Rocky Mountain has developed bronze hardware to specifically interact with the Trilennium™ mechanism—thus making a top of the line multi-point system which meets or exceeds strict hurricane and security codes.
